

## Auto vs. Will Call Customers

The advantages of being an auto customer are that we fill your tank when needed. You do not have to watch your gauge, we do. Another benefit is your propane is \$0.20 cheaper per gallon. Plus if you run out of gas you do not get charged a trip charge, which you will be charged if you are a will call customer and need propane immediately. That charge is \$75.00 during business hours and \$150.00 after business hours and weekends. As an auto customer you will **never** get charged those rates since your tank is our responsibility.

We can do a budget plan for any customer that is will call and would like to be an auto customer.
